

# PROCESS RUNNER

*Powerful SAP Manufacturing integration that works out of the box*

## Solution Benefits

- Upload and download data, information and events
- Supports mass data creation, changes, updates, verification, etc
- Point and click interface - programming or scripting required
- Works out of the box

### Broad Coverage - Use Transaction or BAPIs:

Process Runner allows you to select or choose from hundreds of SAP transaction codes such as CO01 and many other. You may also chose to use Business APIs that SAP already delivered in your system.

### Support all type of Manufacturing transactions:

1. Create and change & Manage Production Schedules (CO01, KKF2)
2. Create-Manage Material requirement (MM01, MM02)
3. Create customer independent requirements (MD81)
4. Approve or disapprove customer independent requirements on the go (MD82)

and thousands of other transactions, BAPIs, tables including customized one.

### Download Manufacturing data:

You can extract Manufacturing tables and views using Process Runner Data Extractor technology. You can even download Long Text and entire business objects using BAPI and other technology offered in Process Runner. With Innowera extension, you can also extract data from Production Planning (i.e. MD81, MD82, MM01, MM02, CK41, CK42, CK44, CO01)

## Solution Overview

Innowera's Process Runner dramatically reduces on-going costs and optimizes efficiencies by automating day-to-day data maintenance and migration operations between your **SAP** and **Microsoft Excel** systems.

## Audience

CHROs, Corporate/Manufacturing Divisional, Data and Process owners, SAP business analysts, SAP data conversion teams, SAP deployment teams.

## "Smart Solutions for Your SAP - Manufacturing Automation Needs"

Process Runner offers broad coverage for SAP Manufacturing master and transactional data creation, maintenance, analysis and monitoring.

Process Runner enables automation for SAP Transaction, BAPI, GUI Scripting and Data Extraction tasks from one seamless application.

### Manufacturing Master Data Record Management:

With increasing competition, agility and pressures to maintain the bottom line growth Process Runner is a perfect tool for updating your manufacturing master data with automation. Using Process Runner frees up those vital resources that could be used more attractively.

### SOX Compliant:

Process Runner implementation will be as SOX compliant as your SAP implementation is – we respect SAP governance.

### Ready to Run Templates:

Process Runner has ready to use templates that will get you started in no time. We have hundreds of templates and we are frequently adding more to our Cloud sample store. Templates allow you start

using popular Manufacturing transactions such as MD82 etc. immediately. You will also have access to ready to use templates for some of the popular Manufacturing Business APIs. These templates come with sample data stored in Excel format with all required recording and mapping already done. Download free trial now and immediately feel the power of simplification.

### Zero ABAP - Works out of the Box:

Here is the best part. Process Runner works out of the box nothing needs to be installed on your SAP side. No more waiting for IT to implement ABAP or create a custom program.
