

PROCESS RUNNER

Powerful SAP Logistics integration that works out of the box

Solution Overview

Innowera's Process Runner dramatically reduces on-going costs and optimizes efficiencies by automating day-to-day data maintenance and migration operations between your **SAP** and **Microsoft Excel** systems.

Audience

Supply Chain Director, Corporate/Logistics Divisional, Data and Process owners, SAP business analysts, SAP data conversion teams, SAP deployment teams.

Solution Benefits

- Upload and download data, information and events
- Supports mass data creation, changes, updates, verification, etc
- Point and click interface - programming or scripting required
- Works out of the box

Broad Coverage - Use Transaction or BAPIs:

Process Runner allows you to select or choose from hundreds of SAP transaction codes such as CS01 and many others. You may also choose to use Business APIs that SAP already delivered in your system.

Support all type of Logistics transactions:

1. Create BOM Material (CS01)
2. Create and Change Billing Document (VF01, VF02)
3. Execute Exception Analysis - Inventory Controlling (MCOG)
4. Material Documents (MB51)

and thousands of other transactions, BAPIs, tables including customized one.

Download Logistics data:

You can extract Logistics tables and views using Process Runner Data Extractor technology. You can even download Long Text and entire business objects using BAPI and other technology offered in Process Runner.

"Smart Solutions for Your SAP - Logistics Automation Needs"

Process Runner offers broad coverage for SAP Logistics master and transactional data creation, maintenance, analysis and monitoring.

Process Runner enables automation for SAP Transaction, BAPI, GUI Scripting and Data Extraction tasks from one seamless application.

Logistics Master Data Record Management:

With increasing competition, agility and pressures to maintain the bottom line growth Process Runner is a perfect tool for updating your Logistics master data with automation. Using Process Runner frees up those vital resources that could be used more attractively.

SOX Compliant:

Process Runner implementation will be as SOX compliant as your SAP implementation is – we respect SAP governance.

Ready to Run Templates:

Process Runner has ready to use templates that will get you started in no time. We have hundreds of templates and we are frequently adding more to our Cloud sample store. Templates allow you start

using popular Logistics transactions such as VL01 etc. immediately. You will also have access to ready to use templates for some of the popular Logistics Business APIs. These templates come with sample data stored in Excel format with all required recording and mapping already done. Download free trial now and immediately feel the power of simplification.

Zero ABAP - Works out of the Box:

Here is the best part. Process Runner works out of the box nothing needs to be installed on your SAP side. No more waiting for IT to implement ABAP or create a custom program.

How it Works

Process Runner is a core enable, driving bottom-line results throughout the data management process across your SAP systems and Excel:

Efficiency. Coverage. Ease-of-Use: PROCESS RUNNER

Solution Highlights

Click and Run - No Programming Required:

Process Runner supports SAP data management by recording, mapping and executing across Transactions, BAPIs, RFMs, and GUI Scripting. Process Runner supports all SAP releases from 4.6c and supports standard as well as custom transactions, BAPIs and RFMs.

Smart and Broad Mapping Types:

Process Runner provides an intuitive use-experience and supports multiple mapping types for custom and standard Transactions, RFMs, BAPIs and GUI scripted processes across the entire SAP landscape.

On-Demand Scheduling:

Advanced frameworks that enable automation and scheduling of script execution for flexibility and control.

Embedded Excel Books:

Excel books embedded in Process Runner provide powerful and robust functionality without having to leave Process Runner for ease-of-use.

Share and Collaborate:

Integrated central file/ template repository. Enables users to share, manage and control Process Runner files to enhance team productivity.

Parallel Processing:

Enables parallel script execution across multiple transactions, BAPIs, RFMs or GUI Scripted processes for high efficiency and productivity.

Data Checks & Validation:

Perform data existence and validation checks to enable accuracy while uploading data to SAP systems.

Multi-lingual Support:

Process Runner supports European languages such as French, German and Spanish. In addition, Process Runner is Unicode compliant and supports Japanese, Chinese and other kanji languages.

Highly Secure & Scalable:

Leverages and preserves in-built SAP systems security to provide application integrity. Process Runner is built on a secure framework and is scalable for large enterprises.
